Valley Business Machines
5825 E. Mayflower Court
Wasilla, AK 99654

As the hometown newspaper for the Mat-Su Valley since 1947, the Frontiersman prides itself on being a good community neighbor and helping to support other local businesses that contribute to our community's success. This success is due in part to businesses like Valley Business Machines. Servicing the Frontiersman's needs for over 16 years, Valley Business Machines has become our only source of copiers and related supplies. The folks at Valley Business Machines are also kind enough to help us out with other temperamental office equipment, even when they don't normally service that brand. However minor, or major our request, we've come to depend on Valley Business Machines over the years.

Conveniently, Valley Business Machines is also our neighbor and we often find ourselves in their office, making thousands of copies and relying on the experience and helpfulness of their staff to assist us in getting our job done. Their staff also makes it easy to order supplies or call for service – one phone call, a quick explanation and they have us back up and running.

The benefits of our long term business relationship with Valley Business Machines: first name basis, reliability, confidence in their products and service – are all reasons why we will be loyal customers for years to come.

Thank you,
Tracy Ressler, Business Manager
