

Valley Surgical Dr. Senta's office

Today, with the help of Valley Business Machines, we have entered the Electronic Age! We purchased Centricity Physician Office practice management software. This has provided a comprehensive solution to our healthcare computing needs – from billing and scheduling to patient information, inventory control, scanning, EDI (electronic submission, remittance, statements and eligibility) and managed care.

In July 2006 we moved our office to the Mat-Su Regional Medical Plaza. Valley Business Machines was able to provide us with complete networking capabilities. At this time we also purchased from Valley Business Machines a new state of the art computer system. This new computer system allowed us to make further changes. We are now on the way to becoming “fully” electronic with our new health record system.

Also with our new Copystar multifunction Copier, Scanner, Printer, Fax machine we are able to scan document's in color into the patient's records in a timely, more efficient manner. We also utilize Valley Business Machines IT support which is included at no extra charge with Rapid Business Recovery.

Valley Surgical Associates understands that the failure of any single PC would be highly inconvenient and could present delays that would manifest themselves as shortcomings in patient management and care. We have implemented a disaster recovery plan to restore access to our information should that data be lost during a disaster. That plan begins with application development environments, hardware and software that hold and display the needed information. Valley Business Machines also recognized this and has been at the forefront in providing Rapid Restoration should there ever be a need to recover our data from a system failure or disaster. This has afforded us the ability to spend our time not worrying about our IT support, but rather on caring for our patients during their time of need for a surgical procedure.

Thanks to Valley Business Machines for all your hard work!

Sincerely,

Stacey Smith
Office Manager
Valley Surgical
